Subject: Can Kenwood TM732A play games?
To: ham-equip@ucsd.edu

I've heard "rumors" that my mobile dualband Kenwood TM732A radio
can play games by pushing the correct button(s) during power-up.
If anyone knows that this cannot be done, or can be done and has
the information, I would appreciate hearing from you. I'll post
a summary of what I find.

Thanks and 73.

I am rebfurbishing a PRC6/6 Army surplus walkie talkie. I need a copy of the
service manual in either English or German. Postage and copy cost repaid.
Can any DL assist?
Danke.

Kevin,
The W&W Associates batteries are as good as any, I've owned a couple in the
past and plan to buy another in the relatively near future. I don't own a
MasterCharger, but I've used one and they seem to be very kind to the battery
during the charge cycle. The one hour model has a microprocessor-controlled
charge rate, so contrary to some previous postings, you DON'T have to worry
about having a thermostat inside your battery to use it. I'd like to pick one
up eventually, I especially like the removeable sleeve idea. You can also get
the MasterCharger from Battery-Tech at (800)442-4275. Hope I've been of some
help.

To: ham-equip@ucsd.edu

A few months ago, when we were under Hurricane watch, I decided I ought to
get my 212 in tip-top shape by replacing one the burned out dial lamps on
it. I totally f****d up and ended up toasting the control board. I'm looking
for hints on where to send the thing for repairs.

Thanks in advance

I own an FT-470 and like it. It's the most user friendly dual bander
on the market. And since Yaesu has come out with the 530, it's also
being sold at reduced prices. A good deal.

Gary
